

The world's first 24-port high-density gateway

- SIP/H.323 compliant
- Echo-canceling DSP
- Includes NAT router
- Auto-reboot function

Our high-density gateway has 24 ports – eight more than standard models. So users can vastly expand their existing office VoIP network. Plus, it features a built-in echo-canceling DSP for crystal-clear sound quality. To meet your time-to-market needs, we offer efficient 10-day delivery, with samples available in just two days. Orders for as few as 10 units are welcome, so send us your specifications today.
